
Many unknowns and no US country or flags?

Posted by jmlavoie - 2011/08/27 21:21

I am running Joomla 1.5.23 and have installed the 3.0.3 component, and the jstats_flags 3.0. I saw US flags at first but now I am not seeing any US flags and the US is not coming up in the component. However, I get a large portion of Unknowns. I am pretty certain that most of my visitors ARE from the US. Is there any issue that might be causing this?

My website is www.rokcoleta.com and the stats are listed at the bottom right.

Thanks!
