

Activation Module (mod_jstats_activate)

Thursday, 11 January 2007

Last Updated Thursday, 29 January 2009

This is module Activation Module (mod_jstats_activate) Homepage - extension to 'Joomla CMS' and 'JoomlaStats'

This module activates JoomlaStats.

Just install this module like any other Joomla module to activate JoomlaStats. This way you don't need to change the template.

There are several ways to activate JoomlaStats, they are described in the activation FAQ.

In the past you needed to add some lines to the site template.

Now you just download the latest mod_jstats_activate module, install and publish it...

It's soooooo easy !!!

History:

2008-10-24 SVN r127

[#13304] Unify format in all *.xml files
